

Wearing a **Matrigon** reveals the „truth“ of the person. It suits perfectly for all men with clear intents; for persons who decided to go in a specific direction.

As it acts like a "lie-detector" (one is no more able to deceive oneself), own projects can be supported much easier.

The Matrigon hides a very powerful energy; it promotes and enhances transcendental and extrasensory cognitive abilities.

During an energetic-therapeutic healing session, this chakra-stone can be placed on the chakra with the corresponding color.

The Matrigon consists of two triangles which melt into each other. This pendant amalgamates "Heaven and Earth" and balances male / female energies in a very harmonic way.

TACHYON ENERGY SYSTEMS

The development and manufacturing of our BIOTAC VITALINE® tachyon products was based on the desire to create lightful tools for energetic-therapeutic purposes.

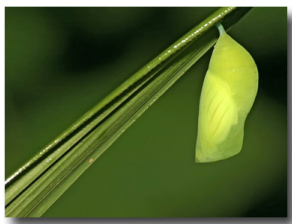

Decisive for their realization is our connection to gemstones and their effects on body, mind and soul. Commentaries about the application for healing purposes are to be found in all antic cultures; the oldest information originate from the 4th

millennium BC and were found on Sumerian clay tablets. Chromotherapy (color healing) and lithotherapy (crystal healing) are probably one of the eldest forms of therapy on earth.

Each individual tachyon chakra-stone from our assortment is a handmade unique piece. Its energetic potential bases on biophysical principles (theory of colors according to J.W. von Goethe). Besides the 15 available colors we integrated ancient knowledge about the effects of shapes.

During a chakra-balancing with tachyons body, mind and soul relax on a very lightful and harmonic way.

Most of the clients "recognize" the emotional patterns which underlies to the symptoms and are able to clear and to transform it in short time.

From a bio-energetic point of view, the **Tree of Life** contains all aspects of life and promotes, if worn, the unexhausted potential of the past, present and the future.

Of all BIOTAC VITALINE® tachyon products we offer today, the creative principle is most prominent in the Tree of Life: it represents the most explicit expression for the cabbalistic background of its origin. We tried to manifest this immemorial symbol into a three dimensional shape.

Wearing this pendant might help to feel more grounded, to feel the contact with earth and to perceive life much more clearer.

The Tree of Life is often chosen by persons who don't feel cantered and by men

who often get bogged down in details.

From experience we know that especially day-dreamers are attired by this pendent. Used during energetic treatments it can be used to "recall" cells how they should "work". If taken in the hand, the Tree of Life can be used as a tool; stroke it with gentle movements in order to „re-activate“ the meridian-flow.

This color frequency contains the energetic potential of all spectral colors. In addition it's the ideal color for body and chakra-cleaning, as known from the White Aura-Soma Pomander.

The energetic potential of the **Sunray** has to do with creation and universe.

It helps to create "something" out of the "void", to materialize "something". The hole in the middle symbolizes the „nothing“; it is exactly from there, where „something“ emerges. Out of this hole rays and spirals are sparkling. One can "put something" in the body or "extract something" out of the body.

The application of the **Xyluriz** can help to „dissolve“ karmic and energetic blockages; its energy is so gentle and smooth like a newborn baby. The Xyluriz is very calming and can be used if suffering acute pain; just place it where on the "hot-spot". Furthermore, this pendant suits perfectly to protect one from "external" energetic influences. In such cases we do recommend to wear the violet Xyluriz.
